1. Me along with my wife and 11 month baby were travelling from Tumkur to Bangalore on 17/12/2023 and at around 8.49PM a XUV300(KA52N1540) car tried to cut me, later threatened me to park my car aside, fearing the worst I parked my car in Kamath Petrol Pump just before Dabaspete

2. they got down from the car and started attacking my car door and window. I didn't get out of my car as my wife and the baby were seated behind and were very scared. Miscreants were drunk and broke my right driver side glass and damaged my door. Later they fled the scene.

3. We immediately called police, highway patrol arrived at the scene and took us to Dabaspet police station to file a report, unfortunately I couldn't meet the inspector. The subordinates took a written complaint and assured to nab them by tomorrow. Hope justice will be served.

This is the usual scene on the Nelamanagal-Tumkur highway, exacerbated by the narrow road and a lack of line discipline among various types of vehicles like trucks. Improved infrastructure and better adherence to traffic rules could alleviate these issues.
